

Recycling In Our Community.

Communities need to recycle

I feel that we should recycle because it is good for the environment as it reduces rubbish. After waste goes into the yellow bin, it goes to the recycling factory to be made into new things and is reused.

Firstly, recycling is good because we can reuse cardboard, paper, bottles and plastics to create new products.

Secondly, recycling paper and cardboard is good for the earth because we can stop cutting down trees. Recycling is important because 44 million trees are cut to make paper and cardboard each year in Australia.

Thirdly, pollution is dangerous because it can get into the sea and kill sea animals, including turtles.

I think that the whole world should recycle their waste to make the earth cleaner.
